

## PYTHON SCRIPT( WATER ,TEMPERATURE, HUMIDITY,PRESSURE )

Date	16 November 2022
Team ID	PNT2022TMID21676
Project Name	Project – IOT Based Real time River Water Quality Monitoring and Control System
Maximum Marks	4 Marks

### PYTHON CODE

```
import random
print('Hazardous Water Level=',str(random.randint(0,100)))
print('Temperature=',str(random.randint(0,100)))
print('Humidity=',str(random.randint(0,100)))
print('Pressure=',str(random.randint(0,100)))
```

The screenshot displays a Python IDE with two windows. The left window shows the source code for a script that generates random values for four variables: Hazardous Gas Level, Temperature, Humidity, and Pressure. The right window shows the execution output, where the script has been run, and the generated values are displayed: Hazardous Gas Level= 46, Temperature= 31, Humidity= 74, and Pressure= 96.

```
python code.py - E:\python\python code.py (3.9.8)
File Edit Format Run Options Window Help
import random
print('Hazardous Gas Level=',str(random.randint(0,100)))
print('Temperature=',str(random.randint(0,100)))
print('Humidity=',str(random.randint(0,100)))
print('Pressure=',str(random.randint(0,100)))
